Context and decision record

Lumen Initiative 001 develops Lumen Document Discovery 001 for research teams at Cedar Pilot Organization 001. The workflow helps users find approved source passages. This document covers the implementation checkpoint and gives the team a stable reference for decisions about document discovery. The current review priority is quality; that priority is a stated preference, not a numeric performance claim.

The checkpoint describes work against the agreed interface contract. The frontend may use fixtures while the service is being implemented, but the fixtures must be generated from the same schema. Shared files have one owner during parallel work, and any proposed contract change is reviewed before integration.

Completion means the integrated behavior satisfies the acceptance checks with the real service boundary in place. A branch that compiles is useful progress, but it does not establish the task outcome. The team records the remaining limitations and the exact revision associated with each verification artifact.

For this project, the team will inspect Lumen 001 Gateway and retain the source records behind each material finding. This record must be read using its recorded publication time. Follow-up decisions should identify their assumptions, the person responsible, and the observable condition that would change the recommendation. The document is intentionally part of a fictional evaluation corpus and contains no private customer data.

Evidence statements

S01 Ava Cedar (001, synthetic) implements Lumen Initiative 001.

S02 Lumen Document Discovery 001 depends on Lumen 001 Gateway for the implementation checkpoint scope.

S03 Cedar Pilot Organization 001 participates in the implementation checkpoint for Lumen Initiative 001.

S04 Delivery Team 01 operates Lumen 001 Gateway.

S05 Lumen 001 Gateway is part of Lumen Document Discovery 001.
