Context and decision record

Lumen Initiative 001 develops Lumen Document Discovery 001 for research teams at Cedar Pilot Organization 001. The workflow helps users find approved source passages. This document covers the access review and gives the team a stable reference for decisions about document discovery. The current review priority is quality; that priority is a stated preference, not a numeric performance claim.

The review follows data from the authenticated user through lookup, processing, and export. Resource ownership is checked by application code before retrieval. Text inside an imported document is treated as content and cannot grant a new permission or redirect a privileged tool invocation.

The reviewer tests an allowed request, a request for a different workspace, and a malformed identifier. Rejected actions remain visible in the local audit record without exposing protected content. Credentials are stored outside the document corpus and are excluded from diagnostic attachments.

For this project, the team will inspect Lumen 001 Index and retain the source records behind each material finding. This record must be read using its recorded publication time. Follow-up decisions should identify their assumptions, the person responsible, and the observable condition that would change the recommendation. The document is intentionally part of a fictional evaluation corpus and contains no private customer data.

Evidence statements

S01 Nora Cedar (003, synthetic) reviews access for Lumen Initiative 001.

S02 Lumen Document Discovery 001 depends on Lumen 001 Index for the access review scope.

S03 Cedar Pilot Organization 001 participates in the access review for Lumen Initiative 001.

S04 Delivery Team 01 operates Lumen 001 Index.

S05 Lumen 001 Index is part of Lumen Document Discovery 001.
